

SimplyUnite
Perfect for the SCIE
"Get Connected" Grant

www.simplyunite.com 0845 388 4453 info@simplyunite.com

As you may well be aware The Department of Health has established capital funds to enable registered care providers to access digital technology more effectively.

The 'Get Connected' fund is being administered by SCIE who will distribute grants to eligible providers of adult social care services in England – with a strong focus on small providers who do not have good access to the internet.

With this Fund available from SCIE there has never been a better time to bring email, life stories and the internet to those in registered care homes, as well as providing easy access to online training materials for carers.

SimplyUnite are one of the registered suppliers for the grant and have experience in identifying the right solution for your service users and carers alike, with the service being recognised by NAPA, amongst others.

They have successfully delivered and supported systems in residential, nursing and dedicated dementia units and would welcome the opportunity to introduce the options you have as well as being happy to support you through the application process.

For more information about how SimplyUnite can help you to "Get Connected" please call Toby Hart on 0845 388 4453, email info@simplyunite.com or visit www.simplyunite.com before 18th February 2010.
